

Nominee: Silver Fox Limited

Nomination title: LABACUS® INNOVATOR SOFTWARE & Fox-in-a-Box®

USP: THE SIMPLEST LABELLING SYSTEM IN THE WORLD – TESTED TO THE HIGHEST SPECS

Included in the Fox-in-a-Box® solution is the Labacus® Innovator Software which enables printing of many different label types suitable for use within different industries. It is especially interesting for Data Centres as Labacus® Innovator Software Utilises Ordinary Office Laser Printer and can print Legend™ and Prolab® wire and cable marking brands with ease of efficiency saving both time and money. Data Centres can look effortlessly neat and tidy using this solution. The basic level of software is downloadable Free of Charge so users can try before they buy. For laser labels the only equipment needed are a computer or laptop (with suitable operating systems) and a laser printer.

Laser labels from Legend™ and Prolab® brands are available as A4 sheets and US letter sheets.

The Professional level software can print has all the features of the other levels but in addition has the capability for:

- Bar codes and QR codes

Graphics

Full spreadsheet view on import

Variable duplication allowing different quantities if each cable ID

Cross-Ferruling functionality

Professional Satellite technology offering locked jobs for distant sites

Silver Fox software Tips - Time into Profit by making our customers lives easier, we do the hard work so they don't have to. The Labacus® Innovator Software for data centre use on laser printers is FOC (basic level) and the Fox-in-a-Box® thermal solution; one software, one printer, one ribbon is for other uses.
