

## **Dan Kwach East Africa Data Centre**

### Testimonials:

Ben Roberts, CTO of Liquid Telecom Group:

*“Dan is now one of a handful of DC experts in Africa – and, of this small group, he is definitely the most generous in sharing his knowledge and expertise with customers, partners – and his colleagues. It would be great to see his hard work rewarded on the global stage.”*

Harry Hare, Chairman at CIO East Africa

*“Africa is finally producing its own entrepreneurs and business-creators - and Dan Kwach is a perfect example.*

*He is the driving force behind the success of the East Africa Data Centre which has set the standard for data centres across Africa - and is something that we in Kenya are very proud of.*

*Despite his heavy work schedule, Dan always has time to mentor and contribute towards the development of our youth which is vital as Africa’s infrastructure continues to expand.*

*I highly recommend him for this award.”*
